Re: patch and repair instructions for Roofnado™ LapLock™ PSU HT and AnchorDeck™ PSU Underlayments

To Whom It May Concern,

The purpose of this letter is to provide instructions on how to patch and repair holes and damage in Roofnado™ LapLock™ PSU HT and AnchorDeck™ PSU Underlayment after installation.

- Repair all damage, tears, and holes, including those caused by removing nails or fasteners, with a round patch of underlayment extending at least 6" beyond the damaged area in all directions. For LapLock™ repairs, do not include the dual-locking lap-lock zone in the round patch.
- Seal around and under the edges of the patched area with silicone caulk.

Please feel free to contact me if you have any questions regarding this information.

Sincerely,

Greg Jones
